# 8 WEEKS FROM MOVING DAY

- Ask yourself when do you want to move? Visit www.safurnitureremovals.co.za to make your execution date and move easier.
- Before the survey, inspect you goods and decide which items you would like to move
- Dispose of any unwanted items e.g. have a sale in your neighbourhood, sell items on the net or donate to the needy (very important dispose of any hazardous items).
- Make your decision, will you be doing the packing or a company?, SA Furniture Removals (Pty) Ltd suggests that private items must be packed away in boxes by yourselves. Your quote will be substantially lesser when doing your own packing.
- Begin packing items you will not be using in the next month or two ahead of time.

## Ideas when packing your boxes

- Give a box a number it will keep you in control of your boxes and you will not feel overwhelmed with too much boxes
- Then you have Colour – Get Stickers or coloured permanent markers – Colour code your boxes for each room.
- And a priority to have your boxes marked as breakable with a different colour e.g. a bright red and mark box breakable.
- Finally have an inventory list of what items are in which box number and keep your list with you at all times. When you arrive at your new destination and you really are in a need of a cuppa coffee you can check your inventory list and see in which box you packed your kettle, coffee, sugar, and cups for this moment.

Happy days to follow, SA Furniture Removals (Pty) Ltd. recommend that you follow these few simple instructions to make your move feel much more controlled and less like chaos.
