

NOTES

- Whenever possible, make alternative arrangements for children and 4 legged children on moving day. It is best when you and the movers can give one another your undivided attention for the entire move.
- Keep all connection e.g. phones etc. connected until after the move is completely finished. Your ability to fully communicate with your mover and everyone else can be critical.
- Make sure all appliances are plug out and pipes are drained before the movers start loading appliances, all freezers are defrosted etc. this will save the movers time.

Tips for Packing

Short and sweet

1. Pack a survival kit – essentials for first night
2. Pack lighter items in larger boxes & heavier items in smaller boxes
3. Use clean white paper for wrapping NO NEWSPAPER
4. Label cartons for the room its going into/ as explained in 8 weeks from moving day
5. Fasten electrical cords/roll up and tape behind appliances
6. Layers – heaviest on the bottom
7. Pack books with spine on the bottom
